Composition of the Career Staff Workforce by Race and Sex

The University of California has a long history of promoting the diversity of opinions, ideas, and backgrounds that its students, faculty, and staff bring to the university community. Consistent with its history and its obligations as a Federal contractor, the University is committed to achieving and maintaining equal employment opportunity for all employees and applicants for employment. This annual report presents a snapshot of the racial/ethnic and gender composition of the career staff workforce at the University of California as of October, 2005 and October, 1998. The report covers all levels of career staff at the campuses, medical centers, and the Office of the President. In addition, the report presents a snapshot of the career workforce at the Department of Energy (DOE) National Laboratories as of October, 2005.

Trends – Campus, Medical Center, and Office of the President

In 2005, minorities made up 47.3% of the career staff workforce, compared to 42% in 1998. During the same period, Asian and Hispanic representation grew while American Indian/Alaska Native and Black representation declined slightly.

The representation of females in the career staff workforce remained relatively unchanged at about 65% over the seven-year period. However, the representation of minority females increased from 26.9% to 31.8% over the same period.

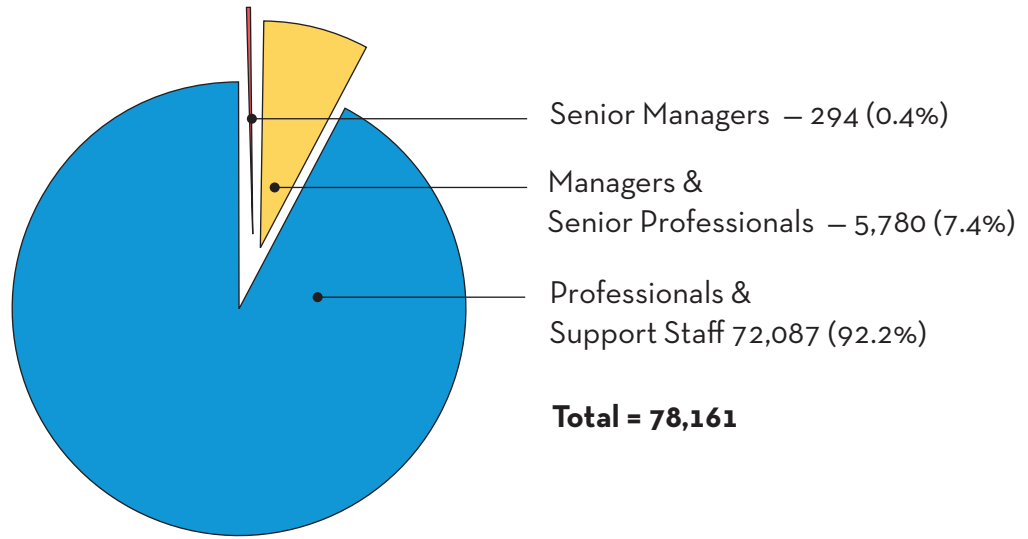

When broken down by personnel category, females accounted for 66% of Professional and Support Staff, 51.6% of Managers and Senior Professionals and 30.6% of Senior Managers in 2005, while minorities represented 49.3% of Professional and Support Staff, 24.4% of Managers and Senior Professionals and 14.6% of Senior Managers.

Source of Data

Campus and medical center data for this report were extracted from the Corporate Personnel System, while laboratory data were provided by each of the DOE National Laboratories. Race/ethnicity and sex classifications were based on employee self-identification information collected during the hire process, as well as from periodic self-identification surveys at the locations.
