

10,466 strong

On June 18, 2020, in a 5-4 ruling, the U.S. Supreme Court struck down the Trump Administration's arbitrary attempt to end the Deferred Action for Childhood Arrivals (DACA) policy. This decision was a big win for the hundreds of thousands of DACA recipients across our country, their families and our communities.

Since the Trump Administration's decision to rescind the DACA policy in 2017, the University of California has underscored the urgent need to provide DACA recipients and other undocumented members of our community with permanent protection from removal, the ability to continue to lawfully work in the United States and a path to citizenship.

Following the court's decision, 10,466 UC advocates signed the below pledge calling on Congress to provide permanent legal protections for DACA recipients and other members of our undocumented community.

The decision of the U.S. Supreme Court to strike down the Trump Administration's arbitrary attempt to end the Deferred Action for Childhood Arrivals (DACA) policy was a hard-fought victory for the young people who came forward in good faith and applied for protections to live, work and study in the United States. But this reprieve from the courts is not a permanent solution.

DACA recipients, including the thousands who currently attend or have graduated from the University of California, are integral members of our communities. They are our classmates, colleagues, friends and family members. They work side-by-side with us and make important contributions to every facet of our culture and economy. They deserve to know that this is their home – forever.

We stand with the University of California in calling on the U.S. Congress to pass legislation that will permanently protect DACA recipients and other members of our undocumented community.
